

Gate Check Report — G1–G4 Multi-fAMILY Punchlist

Project: ALG Staging Site — multi-fAMILY Collection

Punchlist: MANUS_MULTIFAMILY_2026-05-11.md

Checked by: Manus

Date: 2026-05-11

Commits: 74196a5, 94447a4 on main

Staging URL: <https://staging.archipelagolighting.com>

F9 — Collection Page: Hero, Stats, and Headlines

Check	Expected	Result	Status
Browse-by-Application tiles	4 tiles: Housing Cans, Recessed Downlights, SafeZone Downlights, Surface Mount	All 4 present with correct SKU counts (8, 22, 8, 21)	 PASS
Stat strip — Families	8 Families	8 Families	 PASS
Stat strip — Active SKUs	59 Active SKUs	59 Active SKUs	 PASS
Stat strip — Applications	4 Applications	4 Applications	 PASS
Featured section headline	“Three flagship families from the multi-fAMILY collection.”	Correct	 PASS
All Families section headline	“Eight families from the multi-fAMILY collection.”	Correct	 PASS
Hero badge strip	VALUE-ENGINEERED · CODE-COMPLIANT · JA8 / TITLE 24 · 48-HR LAYOUTS · 5-YR WARRANTY	All 5 present	 PASS

F10 — All Families Grid: 8 Cards, Sub-categories, Echelons, VIEW Links

Family	Application	Echelon	Max Wattage	SKU Count	VIEW → Link	Status
Gehry	Housing Cans	PRO	—	8	/products/multi-family/gehry/	 PASS
Nebula-II	Recessed Downlights	ECO	15W	12	/products/multi-family/nebula-ii/	 PASS
Orbit-I	Recessed Downlights	ECO	15W	4	/products/multi-family/orbit-i/	 PASS
Radius-II	Recessed Downlights	PRO	18W	6	/products/multi-family/radius-ii/	 PASS
Radius SafeZone	SafeZone Downlights	PRO+	19W	8	/products/multi-family/radius-safezone/	 PASS
eCrescent	Surface Mount	ECO	15W	5	/products/multi-family/ecrescent/	 PASS
Eclipse-II	Surface Mount	PRO	24W	13	/products/multi-family/eclipse-ii/	 PASS
Lunar Eclipse	Surface Mount	PRO	18W	3	/products/multi-family/lunar-eclipse/	 PASS

All 8 VIEW → links resolve to correct `/products/multi-family/{slug}/` PDPs. Filter controls (Application, Echelon, Max Wattage, CCT, Voltage, Mount Type) all present and functional.

F11 — Radius SafeZone PDP

Check	Expected	Result	Status
HTTP status	200 OK	200 OK	 PASS
URL	/products/multi-family/radius-safezone/	Live at correct URL	 PASS
H1	“Radius SafeZone”	Correct	 PASS
Breadcrumb	HOME › PRODUCTS › RESIDENTIAL › MULTI-FAMILY › RADIUS SAFEZONE	Correct	 PASS
Stub notice	“Full spec sheet coming soon” or equivalent	Present	 PASS

F12 — Mega-Menu: 4 Applications, Hover Panel

Check	Expected	Result	Status
Application items	Housing Cans, Recessed Downlights, SafeZone Downlights, Surface Mount	All 4 present	 PASS
Hover panel	Right-side panel fires on hover with family tier cards	Functional	 PASS
Old “Wally” entry	Removed	Not present	 PASS
Links	Each application item links to /collections/multi-family/ with correct anchor	Correct	 PASS

Summary

All G1–G4 punchlist items pass gate checks F9–F12. The multi-f[®]MILY collection page, All Families grid, Radius SafeZone PDP, and mega-menu are all live and correct on staging.

Escalation Items

The following items require stakeholder input or additional assets before production launch.

ESC-01 — Eclipse-II maxWattage discrepancy (CONFIRM WITH ENGINEERING)

- **Featured card** shows **18W max** (value sourced from `featured[]` array in `multifamily.ts`)
- **All Families card** shows **24W max** (value sourced from `sku-index.json`, `maxWattage: 24`)
- The two data sources are out of sync. Engineering should confirm the correct rated maximum wattage for Eclipse-II and one source should be updated to match.

ESC-02 — Nebula-II maxWattage discrepancy (CONFIRM WITH ENGINEERING)

- **Featured card** shows **20W max** (value sourced from `featured[]` array in `multifamily.ts`)
- **All Families card** shows **15W max** (value sourced from `sku-index.json`, `maxWattage: 15`)
- Same root cause as ESC-01. Engineering should confirm and a single authoritative value should be set in `sku-index.json`; the `featured[]` override in `multifamily.ts` should then be removed or aligned.

ESC-03 — Product photography missing for all 8 PDPs

All 8 multi-f[Ⓐ] MILY PDPs are live as stub pages. No product photography has been supplied. PDPs currently render with placeholder image blocks. Photography assets are needed before production launch.

ESC-04 — WorkDrive datasheet URLs still placeholder

At least 3 family PDPs reference placeholder Zoho WorkDrive datasheet URLs (e.g., # or `https://workdrive.zoho.com/...` with a stub path). Final datasheet PDF links must be supplied and updated in the relevant PDP source files before production launch.

Report generated from staging verification on 2026-05-11. All checks performed against commit 94447a4.
