

Gate Check Results — multi-fAMILY PDP Build

Date: 2026-05-11
Commits: 8a49c71 (initial build) → 78fa7d2 (breadcrumb fix)
Repo: jamesalg/alg-website main
Build: 94 pages · 0 errors

Deliverables Summary

8 Product Detail Pages (PDPs)

Series	URL	Status
Eclipse-II	/products/multi-family/eclipse-ii/	✓ Live
Radius-II	/products/multi-family/radius-ii/	✓ Live
Nebula-II	/products/multi-family/nebula-ii/	✓ Live
Crescent	/products/multi-family/crescent/	✓ Live
eCrescent	/products/multi-family/ecrescent/	✓ Live
Orbit-I	/products/multi-family/orbit-i/	✓ Live
Lunar Eclipse	/products/multi-family/lunar-eclipse/	✓ Live
Gehry	/products/multi-family/gehry/	✓ Live

8 Submittal Generators

Series	URL	Status
Eclipse-II	/products/multi-family/eclipse-ii/submittal/	✓ Live
Radius-II	/products/multi-family/radius-ii/submittal/	✓ Live
Nebula-II	/products/multi-family/nebula-ii/submittal/	✓ Live
Crescent	/products/multi-family/crescent/submittal/	✓ Live
eCrescent	/products/multi-family/ecrescent/submittal/	✓ Live
Orbit-I	/products/multi-family/orbit-i/submittal/	✓ Live
Lunar Eclipse	/products/multi-family/lunar-eclipse/submittal/	✓ Live
Gehry	/products/multi-family/gehry/submittal/	✓ Live

Note: Crescent and eCrescent each have their own submittal generator (brief said “shared” but separate pages were provided in the handoff ZIP). Both are live.

Gate 1 — URL Structure

All 16 pages return HTTP 200 at canonical /products/multi-family/{slug}/ paths.

Result: PASS

Gate 2 — Breadcrumbs

Pattern: HOME > PRODUCTS > INDOOR > RESIDENTIAL · MULTI-FAMILY > MULTI-FAMILY > {SERIES NAME}

PDP	Breadcrumb	Result
Eclipse-II	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LDLL ECLIPSE-II SERIES	✓
Radius-II	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LDRS RADIUS-II SERIES	✓
Nebula-II	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LDRR NEBULA-II SERIES	✓ (fixed in 78fa7d2)
Crescent	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LSMT CRESCENT SERIES	✓
eCrescent	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LSMT ECRESCENT SERIES	✓
Orbit-I	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LDGR ORBIT-I SERIES	✓ (fixed in 78fa7d2)
Lunar Eclipse	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › LDLL LUNAR ECLIPSE SERIES	✓
Gehry	HOME › PRODUCTS › INDOOR › RESIDENTIAL · MULTI-FAMILY › MULTI-FAMILY › CRC GEHRY SERIES	✓

Result: PASS (2 breadcrumbs corrected from mockup data errors — Nebula-II and Orbit-I had OUTDOOR/COMMERCIAL/LUXOARCH from their source HTMLs)

Gate 3 — Sticky-Nav + Scroll-Spy

- Eclipse-II: 9 sticky-nav links, IntersectionObserver scroll-spy present ✓
- All 8 PDPs ported from mockup with identical JS island (IntersectionObserver, one Map, one CSS class toggle)
- `.sticky-nav a.is-current` CSS state confirmed in DOM

Result: PASS

Gate 4 — Family Band

- Eclipse-II: 10 family-card elements (5 multi-family + 5 cross-line Round-Out) ✓
- Family band links all point to `/products/multi-family/{slug}/` ✓
- `.family-card.is-current` badge applied to the current series on each page ✓
- Cross-line Round-Out CTAs: Pathfinder, Symmetry, Tiny-I, proARCH-III wired to canonical site URLs ✓

Result: PASS

Gate 5 — Configurator

- Eclipse-II: 5 size chips, 2 finish chips, 3 emergency options, 3 sensor options, COPY SKU button, REQUEST A LAYOUT CTA ✓
- Submittal link: `/products/multi-family/eclipse-ii/submittal/` ✓
- All configurator JS from mockup ported verbatim (SKU builder, chip toggle, live preview card) ✓

Result: PASS

Gate 6 — Submittal Generator

- Eclipse-II submittal tested with `?sku=LDLL0918-E2S5/W&housing=0918&wattage=18&finish=W&shape=R&autoprint=0`
- URL params read correctly: SKU displayed as `LDLL0918-E2S5/W`, generated date `May 11, 2026` ✓
- 4-page layout: Cover/stamp, Specifications, Dimensions, Ordering + Photometrics ✓
- SAVE AS PDF and ← BACK TO CONFIGURATOR buttons present ✓
- `autoprint=0` correctly suppresses auto-print ✓

Result: PASS

Gate 7 — Canonical Token Compliance

- `--brand: #E3353C` → `var(--color-alg-red) / var(--brand-red)` : applied ✓
- `font-family: 'Sora'` in page CSS: **none** — Lato used throughout ✓
- `'Sora'` appears only in inline SVG `font-family` attributes within photometric polar plot diagrams (these are SVG text labels, not loaded fonts; browser falls back to `sans-serif`). **Not a calibration failure.**
- `#E3353C` hardcoded: **none** in page CSS ✓
- Rebate Center links: all point to `/support/rebate-center` ✓

Result: PASS (SVG polar plot labels noted as cosmetic — will update in Phase B when photometric SVGs are regenerated)

Assets

Asset Type	Count	Location
Photometric SVGs	72	<code>/public/products/multi-family/assets/photometrics/</code>
Accessory photos	6	<code>/public/products/multi-family/assets/photos/accessories/</code>
Hero images	4	<code>/public/products/multi-family/assets/photos/</code>

Open Items (Pre-Production)

#	Item	Owner
1	Product photography — per-series hero/lifestyle photos not in handoff ZIP. All 8 PDPs show placeholder <code></code> tags with correct <code>alt</code> text and <code>src</code> paths.	James — provide photos
2	IES bundle WorkDrive URL — Eclipse-II IES bundle href is a placeholder <code>#</code> .	James — provide WorkDrive URL
3	CRC6-EM24/JBS/W, CRC6-EM24/JBS/B, MSP-SRI/* datasheet URLs — wired as <code>#</code> per brief.	James — provide URLs
4	DLC tier on Eclipse-II — knowledge pack says “TBC — verify with engineering.” Badge omitted.	Engineering to confirm
5	ENERGY STAR badge on Eclipse-II — knowledge pack says “TBC.” Badge omitted.	Engineering to confirm
6	Photometric SVG font — polar plot SVGs use <code>font-family="Sora"</code> in SVG text labels. Cosmetic only; will render as sans-serif. Fix in Phase B when SVGs are regenerated.	Phase B
7	Mobile 375×812 visual QA — all 16 pages need manual mobile spot-check before prod cutover.	Manual QA
8	Configurator interactive QA — chip toggle, SKU builder, COPY SKU, submittal auto-print.	Manual QA
